A functional container is an integral element of Qbrick box sets. The large capacity and open design allow you to transport items of non-standard dimensions or those that require direct access without opening the cover. The connector system allows you to create multi-element sets with any Qbrick System One box.

Qbrick System ONE Box 2.0 Plus has two adjustable partitions thanks to which you can create the optimal space for yourself.

Version 2.0 of products from the Qbrick System ONE line is a new generation of tool boxes and organizers with a reinforced structure. Additional adaptation of the bodies for mounting threaded inserts in size M8 makes it possible to freely personalize the system to the user's needs.
