Polystyrene disc KSG(100) graphite 67 x 17mm

Disc to close the milled slot in the polystyrene

Advantages of using plugs:

- Plug integrated with the plate,
- Minimizes the formation of thermal bridges,
- Seals the connection
- Plugs are made of polystyrene with a conductivity coefficient of 0.038
- Prevents the appearance of stains on the facade, i.e. the ladybug effect (which can be seen on older facades)
- Eliminates thermal bridges
- Possibility of using shorter plugs

PRODUCT FEATURES:

- Thickness - 17 mm
- Diameter - 67 mm
- In combination with Klimas Wkręć-Met insulation connectors, they create a uniform, high-performance building facade insulation system

Color - GRAPHITE

Plugs are compatible with Klimas Wkręć-Met connectors and cutters
