IBB ID	9979

Product specification

Manufacturer	COMENSAL	Unit	pcs
Brand	comensal bravo	EAN	5902060458058

High-quality stainless steel facade putty - for spreading plaster and plaster - blade width 500 mm - curved elastomer handle

A classic facade putty by the Polish brand COMENSAL with a blade length of 500mm, used for plastering and finishing works. Comfortable. Reliable. With a well-established opinion.

Liked by builders and recognizable in the environment due to the characteristic curved handle. The handle fits comfortably in the hand, regardless of whether it is used with the right or left hand. Paca works double-sided with the same efficiency!

The stainless steel blade has been reinforced with an aluminum profile along the entire length. It is stiff and stable, thanks to which it is easy to obtain the effect of an evenly and thinly distributed plaster.

The solutions, raw materials and technologies used in the production of this tool translate into a noticeable comfort of work and a sense of effectiveness and precision of the effect achieved.

Mortar spreads smoothly

Right and left hand maneuvering is comfortable

The hand remains significantly relieved even after many hours of use

A putty knife of this shape has been a sales hit for years in the category of COMENSAL tools for staffs.

Handle:

The two-component comfortable handle is profiled for the characteristic grip used when working with this type of tool. It "lies" in the hand and relieves it to the maximum during long working hours.

To work with the right and left hand.

To the touch, it resembles a pleasant, smooth but dull rubber: it does not slip, gives a sense of comfort and "control" over the tool, without the need for a constant strong grip.

It is stably connected to the blade with a reinforced aluminum profile. Permanently attached with rivets.

Made of elastomer, it is characterized by high resistance to abrasion and extreme temperatures.

The hole in the handle allows you to hang the putty in the workshop, keep order and, as a result, protect the tool from damage.

Edge:

The spatula blade is made of stainless steel.

It has been permanently embedded in an aluminum profile, additionally reinforced for perfect stiffening of the tool.

It is durable, stable and rigid, it naturally achieves the effect of a smoothly drawn surface.

Dimensions:

Blade length along the sharp edge: 500 mm

The height of the visible part of the blade: 45mm

On other auctions available facade putties in blade dimensions: 150mm - 600mm

Quality:

The tool was made of the highest quality raw materials from proven suppliers, using modern technology that increases resistance to unfavorable working conditions.

They are easy to clean by washing off with water the remains of plaster and plaster that have not dried on.

It is thought out in terms of comfort and usability, it is characterized by extraordinary durability and aesthetics.

Resistant to corrosion, chemical environment, abrasion and even minor mechanical damage.
